

FLE manure fork

Implement used for collection of manure and other light materials, such as mowing waste and branches. Thanks to the small gap between the tines, it minimises material dispersion.

The lower tines are equipped with special reinforcing bushings that prevent the deformation of the frame under the weight of the load.

Technical data sheet

			FLE			
Width			1500	1800	1980	2200
Forks length			850	850	850	850
Implement height			720	720	720	720
Weight			148	168	182	198
Tines			7	8	9	10
