

FPT pallet fork with side-shift

Pallet fork with shifting function allowing side movement of the implement. Its compact, sturdy structure allows loading pallets and palletised loads, minimising oscillations and the risk of falling.

The tines are mechanically adjustable laterally, allowing the implement to adapt to pallets of any shape, and ensuring even distribution of weights.

It requires a third hydraulic line.

Technical data sheet

			FPT 15Q	FPT 20Q
Width			1200	1200
Total length			1000	1100
Implement height			560	560
Weight			205	210
Max. load capacity			1500	2000
Forks FEM IIA			100x35	80x40
Side shifting			210	210
Additional hydraulic lines			1	1
