

Chrome loaders

Moulded around your work and your machine.

The Chrome loader, designed for light work, combines the traditional qualities that characterise Sigma 4 products with a marked versatility in the most diverse fields of use. The aesthetic update made possible by the new solutions adopted and a careful assessment of weights make the Chrome a state-of-the-art product for its intended segment. New covers for the mechanical parallelogram can be fitted on request, further improving the aesthetic harmony of the loader-tractor assembly.

Available for the 10, 15 and 20 series.

Product models

- **Chrome F**
manual levelling
