

Titanium loaders

A concentration of strength and technology.

sigma 4
THE LOADER.

The Titanium high-performance loader range, designed for the toughest jobs, beautifully combines strength and technology, maximum lifting power and best equipment for professional use.

All the hydraulics are located inside a sheet metal passageway, which is easy to dismantle, so as to optimise operational visibility while at the same time safeguarding the pipes from damage and the accumulation of dirt.

Available for the 20, 30, 40, 50 and 60 series.

Product models

- **Titanium M**
mechanical self-levelling system
- **Titanium H**
hydraulic self-levelling system
