

Large square bale fork BB4

Fork designed to handle large square bales. Its lengthened shape allows to stack the bales on one another, to speed up storage of hay and simplify work.

This four-tine version makes it even easier to pick up bales than the two-tine version, and allows their weight to be better distributed over the structure of the implement.

Technical data sheet

			BB4
Width			1240
Forks length			1085
Implement height			2200
Weight			255
Max. load capacity			1000
Tines			4
