

Hydraulic backhoe C Series

The backhoes from the C series allow moving earth by using the rear hitching of the tractor. They are complete with shifting frame and the movement can be controlled hydraulically, without the need for the operator to leave the cab.

Main features

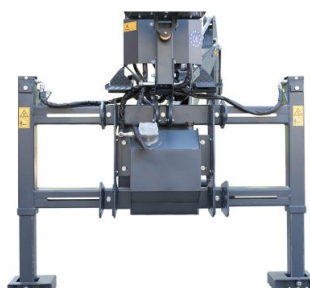

Hydraulic locking

Ergonomically positioned seat

easily accessible and adjustable, allowing operation in conditions of perfect visibility for greater comfort and work safety

Independent support feet with piloted locking valves

They increase translation while ensuring safety in all working conditions.

Technical data sheet

Hydraulic backhoe C Series

		C170	C220	C260	C290	C330	C470
Tractor power range		20-30	35-55	55-90	75-110	100-200	120-200
Excavation depth		1700	2200	2600	2900	3300	4650
Frame width		1100	1400	1500	1700	2000	2000
Total weight		285	410	580	730	1080	1190
Tank		15	22	35	45	60	60
Standard excavation bucket		250	300	300	300	300	300
Standard excavation bucket		14	25	25	25	25	25
Breaking force at the tine		1500	2200	2800	3500	4200	5135
Excavation force with secondary boom		700	1000	1100	1600	1850	1800
